

# New AVliteClean™ Series

- High Performance cleaning
- On /Off vehicle cleaning
- No FoD
- Wearable on belt
- Harsh environment specific

## High Performance Cleaning Kit

The AVliteClean™ is a field deployable cleaning kit used to effectively clean fibre end faces in harsh environments during maintenance prior to testing and mating of connectors. Designed for all main harsh environmental connectors.

The cleaning kit allows all your maintenance cleaning requirements to be met in a convenient carry pouch.

The kit is compatible with most commercial and military fibre optic termini and connectors - including ARINC and MIL specifications.

With over 500 cleans from each stick and three sticks over 1500 cleaning operations can be performed and configured specifically for the connector types you're interested in. See ordering information.

### Compatible Connectors

- \* LuxCis™ (ARINC 801)
- \* Elio™ (ARINC 801)
- \* MIL-PRF-29504
- \* HA / RSC / MFM
- \* MC-3
- \* MC-5
- \* MC-6

### Key Features and Benefits

- \* **All major connectors considered**  
The CK series of kits have been designed to accommodate all main "harsh environment" connectors including Elio™, LuxCis, Mil-T-29504, M83526, MC6, ST etc.
- \* **Minimised Foreign Object Debris (FOD) hazard**  
Minimal FoD hazard with the use of integral cleaning tapes retained in a wearable pouch.
- \* **Easy to use**  
With a simple engage and click to perform cleaning, even with gloved hands.

## Multi-Platform Applications

The AVliteClean™ has been designed to include the best in cleaning products so that all your fibre optic end face cleaning requirements are conveniently available in one place.
